

WindowMate

PART NUMBER: WM-36

The WindowMate is a premium suction mount for windshield or glass applications and features an integrated swivel which allows an additional 30-degree adjustment in any direction. It installs in seconds without tools and is easy to use.

PARTS INCLUDED: WindowMate mount, hardware pack, alcohol pad, adhesive mounting tape

Please read complete instructions before installing the WindowMate.

The WindowMate and glass should be at room temperature during installation.

STEP 1.

The WindowMate is designed to be attached to a windshield or other glass window. Select a location that does not block your vision or controls. Clean the mounting surface with window cleaner to assure maximum suction. Bend the flexible arm into desired shape before attaching to window. Photo 1.

STEP 2.

With the locking lever in the up position, press the suction cup firmly against the glass. Push lever down to attach suction cup to the window. Photo 2. (Lever is colored orange for illustration purposes only).

STEP 3.

An adhesive mounting tape and alcohol pad has been included should you chose not to attach the electronic device with hardware. Following these instructions will help insure maximum adhesion. Clean the surface areas where the WindowMate and the device will touch with the alcohol swab and allow to air dry. Peel the adhesive backing off one side of the tape and carefully press it onto the WindowMate. **This tape is very aggressive so it will not move once it comes into contact with the WindowMate.** Remove the final adhesive backing and place the electronic device onto the tape.
